

cloudLOGGER SCADA

Field engineering.
Connected operations.

TECHNICAL CATALOG

Your operation. One connected view.

cloudLOGGER connects process monitoring, trends, alarms, field logs, asset information and metrological records. Developed by DYSCO EP with a field engineering perspective.

Web y móvil / Web and mobile

Platform visual material published by DYSCO EP.

Built around the operation.

Monitoring and KPIs

Process variables, trends and indicators for operational decisions.

Alarms and field logs

Events and activities, with WhatsApp integration depending on project scope.

Assets and metrology

Equipment, instruments and measurement traceability information.

Integration and AI

OPC UA/DA, Modbus, SQL, APIs and contextual assistance based on project scope.

From field to platform

Instrumentation > PLC / RTU > Radio / Cellular / Satellite > cloudLOGGER > Operations team

DYSCO EP is an official ORBCOMM System Integrator.

Start with your process.

Integration, connectivity, access roles, traceability, deployment and support are defined for each project. Technical and regulatory requirements must be reviewed against the actual installation and agreed scope.
